Bringing in **five awards** at NeoCon 2024, Unity's soft curves invites one to sit and enjoy the warmth of its complete solid wood design. This design illuminates the strength and beauty of wood from its top through its base. Unity's design answered our challenge of how to reduce transportation carbon costs to the environment by the ability of flat packing, ease of assembly and disassembly, as well as reuse and refinish options. The base comes in two pieces that easily slide together and the top is simply bolted to the base. This creates an easy installation solution, which reduces costs to the end user.
